

smartserveTM 410

Non-RFID interactive kiosk

The smartserveTM 410 is a great complimentary kiosk to have alongside our standard RFID and Hybrid (EM/RFID) self-service kiosk range.

Allowing library patrons to utilise additional functions outside of borrowing and returning items, your library has the flexibility to cater to any type of situation.

smartserveTM 410 allows libraries to use functions such as PC reservation and print management, mycommunityTM extended payment services, media disc dispensing, and quick and easy intelligent returns.

Allow for PC reservations and print management

With the appropriate software, your patrons can use the smartserve™ 410 as a stand alone PC booking and print management hub. When attached to a payment station, this combination allows your patrons the freedom to pay for print jobs without having to see a member of staff as well as the flexibility to reserve a PC quickly and easily. Used alongside traditional kiosks in your library, you can keep the flow of your library moving, adding to the overall customer experience for the patron.

Become the core of the community with mycommunity™

Extend patron convenience by accepting council, county & city payments at a smartserve™ 410 within the library. Our robust payment functionality allows patrons who require a 'click and go' experience to make a routine card payment without needing to wait for long periods for the machine to be available. Possible payment services (depending on your community partnerships) could include taxes, rent, parking fines, leisure facilities, and more.

Use as a smartdispenser™ 200 Central Dispensing Unit

The smartserve™ 410 kiosk could be used as a Central Dispensing Unit for our secure disc dispensing towers. When used together, the library patron would identify themselves at the unit, confirm their selected discs and our smartdispenser™ 200 towers will automatically dispense them. This set-up ensures traditional check-out kiosks are free for quick and simple check-out transactions.

Complete the smartblade™ 210 instantaneous return solution

When paired with the smartblade™ 210 return solution, the smartserve™ 410 displays and confirms the RFID tagged library materials that are placed on the shelf and shows them to patrons on the 19" monitor. Patrons are quickly reassured that their items are successfully checked in and removed from their account without any need for interacting with the kiosk.

Specifications

Dimensions (w x d x h):	Millimeters: 510 x 460 x 1443 Inches: 20in x 19in x 57in
Weight:	Kilograms: 60 Pounds: 132.28
