

LOAD-CELL TYPE AUTOMATIC VICKERS HARDNESS TESTER

FLV-AR Series

Controlled by high performanace software FT-ZERO

FULLY-AUTOMATIC VICKERS HARDNESS TESTING SYSTEM

FLV-AR Series

Fully-Automatic Microhardness / Vickers Hardness Testing System has been evolved!!

Innovative elevating type head and wide test load range is adopted.

Advanced intelligent system of high speed sample profiling function.

Improvement of high speed, high accuracy, excellent in operability, reading efficiency and repeatability.

Reliable hardness test as close as human eyes and sensitivity.

Features

Load-cell type loading mechanism

• 15 steps test load and additional test load can be optionally set by "unit 10g" .

• There are 2 models. 10gf \sim 10kgf (FLV10) and 50gf \sim 50kgf (FLV50)

Load apply mechanism by elevating type head

· Large heavy sample and multiple samples can be set at once.

• Work table doesn't require a hole for elevation screw and do not need to choose the place to install the tester.

High resolution camera

· Equipped with a 1.3M pixel high resolution digital camera.

Sample surface inclination/slope correction function

• Z axis shall be controlled along with surface inclination by selecting 3 positions' angle setting. This function is to improve the accuracy of load apply and measurement position. Moreover to shorten the auto focus time, and prevent accidental contact of sample and lens/indenter. (Built- in safety device).

Measurement image saving function

· Measured indentation image can be checked quickly. Easily and quickly edit the data by re-measuring the saved image.

Large motorized XY stage

· Built-in large stage.

- It can be prevented the inclination of stage which shall be created by large heavy sample, and performs highly accurate load apply. It is also quiet.
- It is possible to move the stage to the center by double clicking and move the stage finely by dragging.
- Easy to align the sample's original position and it can drastically shorten the setting time.

Various measuring pattern

- · Fully automated test cycle (indent, measuring, recoding data) by selecting measuring pattern.
- · Random measuring combined with sample profiling function, and measuring function which traces edge of sample as standard feature.

Function which traces edge of sample as standard feature

• Straight • Zigzag • Circle • Arc • Line Set • Random • Matrix • Teaching etc... We will meet users' needs.

Image processing software

· Capability of reading unclear indents on un-mirror surface has been improved by more advanced image processing software.

Various data output format and statistical processing

- For the measuring of carburizing / induction hardening, the selected hardness case depth shall be displayed and recorded on the chart once the multiple measuring is completed.
- Multiple measuring data, Hardness chart, Case depth, Max. value, Min. value, Mean value, Dispersion, Standard deviation, OK-NG criteria, Conversion data etc... various data output shall be available.
- · Display and output of color profile picture linked with hardness values are standard function.
- · Excel data transfer function. Test result shall be exported to the original report Form.

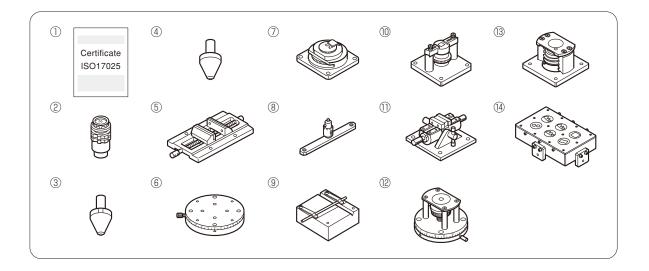

STANDARD ACCESSORIES

ITEM	ITEM SPECIFICATIONS	
HARDNESS STANDARD BLOCK	700HV / 800HV	1
PRECISION VISE	Max.Opening : 50mm	1
DIAMOND INDENTER (BUILT-IN)	For Vickers (HV)	1
OBJECT LENS (BUILT-IN)	×50	1
	×10	1
LEVEL ADJUSTING LEG	For Hardness Tester	4
LEVEL	For Level Adjustment	1
INDENTER COVER (BUILT-IN)	For Hardness Tester	1
MACHINE COVER	ACHINE COVER For Hardness Tester	
POWER CORD	OWER CORD For Hardness Tester	
ACCESSORY BOX	Screwdriver, Wrench, etc.	1
INSTRUCTION MANUAL	-	1

OPTIONAL ACCESSORIES

CODE No.	ITEM			MODEL / CONTENTS
M - 0 6 2	Calibration Certificate		1	ISO17025
LV-001				× 100
LV-004	Object Lens		2	× 20
LV-006				× 5
LV-007				× 2.5
LV-008				× 1.25
M - 0 1 4	Knoop Indenter		3	Rhombic diamond indenter for Knoop Hardness (HK)
M - 0 6 3	For Brinell Hardness Test Tungsten Carbide Ball Indenter		4	<i>ϕ</i> 1mm
M - 0 2 8	Precision Vise		(5)	Max. Opening : 100mm
M - 0 2 9	Rotary Table		6	Graduation of rotary angle : 5° Table dia : 128mm (Mounted onto X-Y stage)
M - 0 3 0	Thin Specimen Measuring Device		\bigcirc	Specimen thickness : 5mm max.
M - 0 3 1	Fine Specimen		8	Specimen dia : ϕ 5mm max. (For measuring cross section)
M - 0 3 2	Measuring Device	/ertical Type	9	Specimen dia : ϕ 5mm max. (For measuring cylindrical surfase)
M - 0 3 3	Specimen Inclining Device	lorizontal Type	10	Specimen height : 5 ⁻²⁰ mm. (For measuring mounted specimen)
M - 0 3 4	Universal Specimen Vise		1	Max. Opening : 45mm
M - 0 3 5	Rotary Mounted Specimen Inclining Device		12	Specimen height : 5~30mm
M - 0 3 6	Mounted Specimen Inclining Device		13	Specimen height : 5~30mm
M - 0 9 1	Fixing Jig for Six Mounted Specimens		14)	For 32 ϕ , 38 ϕ , and 40 ϕ
LV-057	Additional lens unit			For additional lens
LV-058	Additional indenter unit			For additional indenter

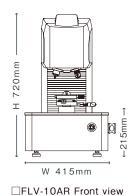

LOAD-CELL TYPE AUTOMATIC VICKERS HARDNESS TESTER

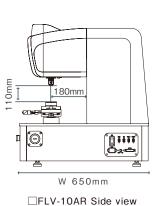

FLV-AR Series

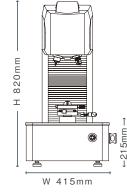

- · A super-wide range from 10gf to 10kgf (from 50gf to 50kgf)
- · Auto-Focus
- · Auto-Reading
- · Auto-Stage (ARS-F)

VICKERS HARDNESS TESTER AUTOMATION SYSTEM

FT-ZERO Series

\sim Software FT-ZERO Function Introduction \sim

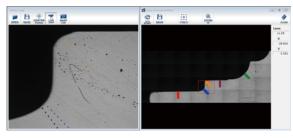

Display multiple test results. (Common to each model) Automatically start, stop, re-measure, save data, recall, replace etc. easily by clicking icons. (Common to each model)

DISTANCE & ANGLE MEASUREMENT FUNCTION

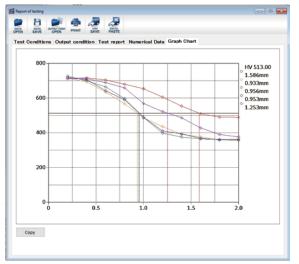

Only click between two points can measure the distance and click three points can measure the angle easy. (ARS • ARS-F)

IMAGE OF PROFILING FUNCTION

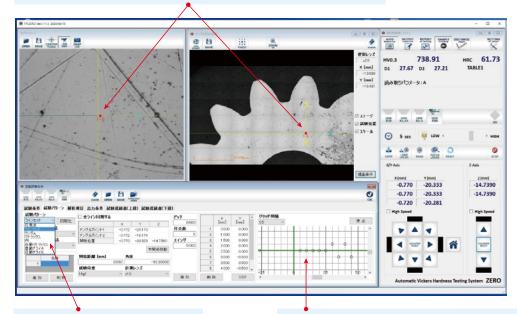

The original position set is very simple by this function to recognize a shape of sample automatically. (ARS \cdot ARS-F)

REPORT GRAPH CHART

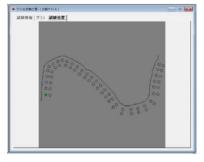

Measurement data can save it in CSV form and transfer it to an original report. (Common to each model)

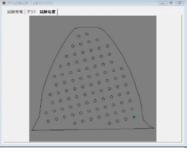

The test starting position and direction of various patterns can be easily set and changed by simply clicking on an arbitrary position on the image. (ARS \cdot ARS-F)

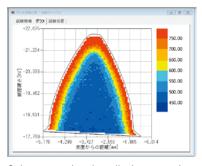

Various test patterns can be selected. Line setting, Random, Matrix, Circle, Automatic end face tracing and etc. (ARS • ARS-F) Complex pattern settings are possible just by clicking the graph. It is possible to set and save the measurement conditions such as loading and measurement lens for each line together with the measurement pattern. Measurement conditions are automatically changed by simply calling a pattern from the list. (ARS • ARS-F)

Test pattern: Automatic end face tracing (ARS • ARS-F)

Test pattern: matrix (ARS · ARS-F)

Color conversion data display example (ARS \cdot ARS-F)

AUTOMATIC INDENTATION MEASUREMENT / AUTOMATIC X-Y STAGE / AUTOMATIC FOCUS SYSTEM(FULLY-AUTOMATIC MEASURING SYSTEM)

ARS-F

By adopting automatic indentation measurement, automatic stage, and automatic focus system, highly accurate automatic measurement is possible in a wide variety of patterns.

All steps of indentation formation, focus adjustment, and indentation measurement after the sample set are performed unattended.

FLV-50ARS-F

FM-810ARS-F

AUTOMATIC INDENTATION MEASUREMENT / AUTOMATIC X-Y STAGE SYSTEM

By adopting automatic indentation measurement and automatic stage system, it is possible to reduce the reading error and individual error by the operator. Achieved a significant reduction in work time.

FM-810ARS

AUTOMATIC INDENTATION MEASURING SYSTEM

By adopting an automatic indentation measurement system, it is possible to reduce reading errors and individual errors by workers. Achieved a reduction in work time.

FLV-50AR

FM-810AR
